PROJECTS

FacadeOC - Local AI Desktop Application (Tauri) | [GitHub](#) | [Live](#)

Jan 2026 – April 2026

- **Stack:** Rust (Tauri), JavaScript (Vite), SQLite, Local LLMs (Ollama), HTML5/CSS3, GitHub Actions (CI/CD).
- Built and released an offline local AI desktop app for Windows, macOS, and Linux using Tauri and Rust.
- Integrated Ollama as a Rust managed sidecar for private, on device LLM inference without cloud APIs.
- Developed a Vite and JavaScript interface with real-time token streaming, prompt management, and chat persistence.
- Designed a SQLite database for chat histories, character profiles, and persistent application state.
- Automated cross-platform builds, signed releases, and OTA updates through GitHub Actions CI/CD.

SocialConnect - Social Networking Web App (Flask) | [GitHub](#) | [Live](#)

Dec 2025 – Feb 2026

- **Stack:** Python, Flask, SQLAlchemy, SQLite/PostgreSQL, Jinja2, HTML, CSS, Bootstrap
- Built a social networking platform with user profiles, posts, and server-rendered pages.
- Implemented registration, login, logout, password hashing, and session-based authentication.
- Added validated CRUD operations for posts using modular routes and clean backend structure.
- Designed relational database models for users and posts with SQLite and PostgreSQL support.
- Created responsive templates and reusable UI components with Jinja2 and Bootstrap.
